Manual sampling pump – 1-channel

EmiTest PUMP

EmiTest Pump

Description

The EmiTest *Pump* is the latest generation of manual emission samplers.
Complies with current standards.
Allows for a wide flow rate range.
Enables the best LQ/LVE ratio to be achieved.
All the innovation of CDL-TECORA.

Key features

- 1 high-flow sampling line via dry gas meter.
- Physical parameters displayed on the front panel.
- Flow rate/volume display via LCD screen.
- Temperature display via LCD screen/isolated sensor.
- Remote control for ease of use.
- Integrated silica gel and condensate traps.
- Data retrieval via data acquisition module.

Technical characteristics

General specifications	
Suction pump	Impellers
Flow rate range	1.0 to 80 l/min
Flow resolution	0.2 l/min
Meter accuracy	±2%
Normal operating conditions	0 to 50 °C - 95% RH
Power supply	230 V AC 50/60 Hz (100 V AC 50/60 Hz)
Weight	Approx. 14.5 kg
